Books

## Summary

As a skilled Web Developer, with experience in React.js, it's natural to build apps and improve them until the user has a optimal experience while using them. In today's reality, being someone who follows new trends and features is essential for success in your work, whether solving bugs or making apps more intuitive and optimized.

## Education

### Universidade Aberta

Computer Science  
Degree

January 2024 - Present

## Certifications

### Web Developer

ZTM

Sep 23 - Jan 24

- Improved my abilities to build websites and web apps using HTML, CSS, and Javascript, in a way that they were responsive, functional, and interactive, where I learned ways to improve outdated code into more recent ones;
- Using react.js and next.js managed to build web applications, and also integrated databases using PostgreSQL and other resources such as Postman and pgAdmin.

<https://zerotomastery.io>

### Responsive Web Design

FreeCodeCamp

Sep 23

- Learned all the basics to build a responsive website.
